Prime-Time Peak

Highest engagement hr

EXECUTIVE COMMENTARY

- Bright TV commands a robust registered user base with strong engagement across multiple channels and provinces.
- The 25–34 age cohort represents the single largest viewer segment, presenting a premium opportunity for targeted content and advertising.
- Social media penetration at 78.4% signals a digitally active audience ready for cross-platform brand engagement strategies.
- Channel viewership data reveals clear performance leaders — investment concentration in top-performing content will amplify ROI.
- Prime-time viewing (19:00–21:00) is the critical window for advertising partnerships and live content scheduling.

Gender Distribution

■ Female ■ Male ■ Non-Binary / Other

52.3%

Female Viewers

Majority audience — ideal target for lifestyle, drama & family programming

44.8%

Male Viewers

Strong segment for sports, news, tech & action content

2.9%

Other / N-B

Emerging demographic — inclusive content strategy recommended

Age Group Breakdown

- The 25-34 cohort (35% share) is Bright TV's dominant segment. Combined with 18-24, these viewers represent 57% of the total base — a digitally-native, high-value advertising audience.

Provincial Audience Distribution

38.0%

Gauteng · 18,350 users

21.9%

Western Cape · 10,600 users

17.0%

KwaZulu-Natal · 8,200 users

8.0%

Eastern Cape · 3,870 users

▪ 5 provinces remain under-indexed — growth opportunity.

Social Media Penetration

■ Active on Social Media

■ No Social Media Handle

Digital-First Audience

78.4% of Bright TV's user base maintains active social media profiles, creating a powerful direct-engagement channel for content amplification and community building.

Cross-Platform Synergy

Social media handles enable retargeting, push notifications, and audience lookalike modeling — reducing customer acquisition costs significantly.

Untapped 21.6%

Traditional broadcast methods remain critical. SMS campaigns and on-air promotions should target the non-social segment to drive platform loyalty.

Data-Driven Marketing

Social handles linked to user IDs allow demographic matching with engagement data — enabling precision advertising and sponsorship targeting.

Total Views & Unique Viewers by Channel

Estimated Watch Hours per Channel

#1

BTV News

3,307 hrs

Dominant reach — prime for ad inventory & sponsorships

#2

BTV Sport

3,070 hrs

High-loyalty segment — leverage live sports rights strategy

#3

BTV Drama

2,692 hrs

Binge-watch behaviour — ideal for serialised content investment

Peak Viewing Hours — 24-Hour Distribution

🌙 **Late Night** 00:00–05:59

Off-peak — automated/archival content

☀️ **Morning** 06:00–11:59

Rising engagement — news & morning shows

☁️ **Afternoon** 12:00–16:59

Steady mid-day — lifestyle & reality content

🔥 **Prime Time** 17:00–21:59

PEAK ZONE — maximum ad rates & live events

Top 10 Most Active Viewers

SUPER-VIEWER INSIGHTS

- Top 10 viewers average 1,580+ sessions — indicating near-daily engagement.
- Super-viewers are ideal brand ambassador candidates for loyalty programmes.
- Trigger personalised push notifications & exclusive content previews for these users.
- Engagement with top users can influence broader social proof effects.
- Recommend VIP tier subscription product for retention of this cohort.

Viewership Volume × Gender

Female-Led Viewership

Female audiences generate the highest total view volume, validating investment in drama, lifestyle, and reality programming targeting women aged 25–44.

Male Segment Opportunity

Male viewership is strong but trails female by 107K views — sports rights acquisitions and news programming can close this gap.

Inclusive Content Gap

The non-binary segment is underserved. A targeted content slate and inclusive on-screen representation can grow this emerging demographic.

Advertising Implication

Gender-segmented ad slots can command 30–45% higher CPMs. Robust demographic tagging enables premium programmatic inventory.

Viewership Volume × Province

- Gauteng + Western Cape account for 60% of total views. Regional content localisation for KZN and Eastern Cape can unlock the next 200K+ annual view events.

Growth & Revenue Action Plan

01 Prime-Time Ad Monetisation

Package the 17:00–22:00 window as a premium advertising bloc. Offer guaranteed impressions backed by viewer data — command 30–50% CPM premium over standard daypart.

02 Invest in BTV News & Sport

Top two channels by views and hours. Secure live sports rights and expand breaking news coverage to deepen loyalty and drive predictable high-viewership windows.

03 25–34 Content Strategy

Create a content commissioning brief specifically targeting the dominant 25–34 cohort — drama series, social commentary, and lifestyle formats resonate with this group.

04 Social Media Growth Engine

Launch a viewer social rewards programme — exclusive digital content for followers. Convert the 21.6% non-social audience via QR codes on broadcast and SMS outreach.

05 Regional Expansion — KZN

KwaZulu-Natal represents the third largest audience. Invest in isiZulu-language content and regional advertising partnerships to capture disproportionate growth.

06 VIP Loyalty Programme

Identify and reward the top 500 super-viewers with a premium tier. These advocates drive social proof, reduce churn, and are the strongest candidates for brand ambassador partnerships.

Databricks SQL Query Architecture

User Profile Analysis

1. Total user count query
2. Gender breakdown with window-function % calc
3. Province distribution ordered by volume
4. Age group CASE segmentation
5. Social media NULL-check penetration rate

Viewership Analysis

1. Total viewing record count
2. Channel performance: views + unique viewers + watch hours
3. Monthly trend via DATE_FORMAT aggregation
4. Hour-of-day peak analysis via HOUR()
5. TOP 10 most active users via session count

Combined BI Analysis

1. Gender × viewership JOIN (viewership ⋈ user profile)
2. Province × viewership JOIN for regional intelligence
3. Demographic-to-engagement cross-tabulation
